DAVIDSON *House-Painting* 106 In order that the graining colours which are mixed with beer may adhere to the ground which has been painted in oil, it is necessary that the surface should be prepared. This is done by passing over it with a sponge moistened with beer and rubbed with whiting; when this is dry, the distemper colour will work freely over the oil, and will adhere to it. 1. A curve of the second order invented by Diocles.

If from any two points lying on a fixed diameter of a circle, and equidistant from the centre, perpendiculars be drawn to the circumference, and a straight line be drawn from one extremity of the diameter to that of either perpendicular, the locus of the point in which this straight line cuts the other perpendicular will be a *cissoid of Diocles*, having its cusp at the end of the diameter. In later times the term has been extended to curves similarly described, where the generating curve is not a circle.

‖ **cithara** ('sɪθərə). [L. *cithara*, a. Gr. κιθάρα.

Musical instruments are subject to great alteration of structure and shape, in process of time, and in different countries. Some of the resulting types become peculiar to one country, some to another. Consequently, cognate names, regularly descended from the same original, come at length to be applied by different nations to very different types of the instrument. Sometimes, also, one or more derivative types, distinguished by diminutive or augmentative names, are used in the same country. When, as often happens, any of these national or local forms of the instrument become subsequently known and introduced in another country, they usually take their local name with them. Hence, the modern languages often use two or three modifications of the same original word applied to as many instruments which different peoples have developed out of the original type. Thus *cither, cithern* or *cittern, citole, gittern, guitar, zither*, are all found in English as names of extant or obsolete instruments developed from the *cithara.*]

1. The Latin name of the citron-tree, now used as the name of the genus which includes the citron, lemon, lime, orange, shaddock, and their many varieties. Freq. *attrib.* or as *adj.*

It is still a question how many of these are specifically distinct. Lindley inclined to consider the whole as long-established varieties of the citron *Citrus Medica*. Hooker reckons about 5 good species, viz. *C. Medica* citron (with *C. Limonum* lemon, and *C. Limetta* sweet lime, as varieties or sub-species), *C. Aurantium* orange, *C. decumana* shaddock, and two others. The native region of these appears to be northern India, esp. about the eastern end of the Himalayas. The earliest known in the west was the citron, cultivated by the 4th c. B.C. in Western Asia, whence it was obtained by the ancient Greeks and Romans. The orange and lemon were found in India by the Arabs, and by them carried westward, reaching Southern Europe about the 12th or 13th c.

Forms: 3–6 cyte, cite, (3 scite), 4 cety, 4–5 cytee, site, 4–6 citee, cete, 5 cetie, sete, 5–7 citie, 6 cittie, citte, cytte, syttey, sittey; also *Sc.* ciete, cyete, scitie, 6–7 citty, (7 chitty), 6– city. [ME. *cite*, a. OF. *cité*, earlier *citet*, corresp. to Pr. *ciptat*, It. *città*, earlier *cittade*, Romanic **civ'tade*:—L. *cīvitāt-em*. By another phonetic process the Romanic type gave Pr. and Cat. *ciutat*, Sp. *ciudad*, Pg. *cidade*. L. *cīvitās*, *-tātem* was sb. of state or condition f. *cīvis* citizen: its primary sense was therefore 'citizenship'; thence concretely 'the body of citizens, the community'; only in later times was the word taken as = *urbs*, the town or place occupied by the community. The historical relation between the Roman *cīvitās* and *cīvis* was thus the reverse of that between our *city* and *citizen*, which however is that of the Gr. *πόλις* and *πολίτης*.]

The name *civitas* was applied by the Romans to each of the independent states or tribes of Gaul; in later times it adhered to the chief town of each of these states, which usually became afterwards the seat of civil government and of episcopal authority. Though there were *civitates* in Britain also in Roman times, the word was not adopted by the Angles and Saxons, who applied the name *burh* to all towns alike. In later times *civitas* may be found as a Latin equivalent of *burh*, and, in Domesday, it is frequently applied to the larger and more important *byriȝ*, *burȝes*, or *boroughs*, which were the centres of districts, and had in some cases municipal autonomy, and thus corresponded in character to the *cités* of France. As an English word, *cité* is found early in the 13th c., applied, both to foreign, and particularly ancient cities, where it is probably due to translation from Latin or French, and also to important English boroughs, such as London and Lincoln. Under the Norman kings, the episcopal sees, which were formerly often established in villages, began to be removed to the chief borough or 'city' of the diocese, as in France; and as the bishops thus went to the cities, there grew up a notion of identification between 'city' and 'cathedral town'; which was confirmed and legally countenanced when, on the establishment of the new bishoprics by Henry VIII, the boroughs in which they were set up were created 'cities'. The same title has been conferred on all (or nearly all) the places to which new bishoprics have been assigned in the 19th c. Historians and legal antiquaries have, however, always pointed out that there is no necessary connexion of 'city' with 'cathedral town', and in recent times the style and rank of 'city' have begun to be conferred by royal authority on large and important boroughs which are not episcopal seats, Birmingham being the first so distinguished in England. (See Freeman in *Macmillan's Mag.*, May 1889.)

In Scotland, the style of *civitas* appears to have been introduced from England, after the association of the word with the episcopal seats. Here, it appears to have had no relation to the size, civil importance, or municipal standing of the place, but was freely applied in charters from the time of David I (12th c.) to every bishop's seat, even when a mere hamlet; it was only at much later dates that some of these *civitates* attained sufficient importance to be raised to the rank of burghs, while others remained villages. In later times, perh. not before the Reformation, *civitas* is found applied to Perth and Edinburgh, which were not episcopal seats, but ancient royal burghs, and seats of royalty. The vernacular form 'city' is found in the 15th c. applied to some of the burghs which were *civitates*, and it gradually came to be commonly used of certain of the larger of these, notably Edinburgh, Glasgow, Perth, and Aberdeen. In this sense, the royal burgh of Dundee was also created a 'city' by Royal Charter in 1889. Some of the other burghs which were formerly bishop's seats, or can show *civitas* in their early charters, have in recent times claimed or assumed the style of 'city', though not generally so regarded.

The history of the word in Ireland is somewhat parallel. Probably all or most of the places having bishops have been styled on some occasion *civitas*; but some of these are mere hamlets, and the term 'city' is currently applied only to a few of them which are ancient and important boroughs. *Thom's Directory* applies it to Dublin, Cork, Londonderry, Limerick ('City of the violated treaty'), Kilkenny, and Waterford; also to Armagh and Cashel, but not to Tuam or Galway (though the latter is often called 'the City of the Tribes'). Belfast was, in 1888, created a 'city' by Royal Letters Patent.

In other lands now or formerly under British rule, 'city' is used sometimes more loosely, but often with more exact legal definition than in England. In North America it usually connotes municipal autonomy or organization of a more complete or higher kind than 'town'. See 2 d, e. In India it is applied titularly to the three Presidency capitals, and to all great towns of historic importance or note, as the seats of dynasties, etc., e.g. Benares, Delhi, Agra, Lucknow, Indore, Peshawur, etc.

The distinction is unknown to other Teutonic and (now) also to Romanic languages: Ger. *stadt*, F. *ville*, It. *citta*, Sp. *ciudade*, etc., translate both town and city.

I. † 1. *orig.* A town or other inhabited place. Not a native designation, but app. at first a somewhat grandiose title, used instead of the OE. *burh*, BOROUGH. Frequently applied (after *civitas* of the Vulgate = *πόλις* of N.T. & LXX.) to places mentioned in the Bible which were really mere villages, *e.g.* Nazareth, Nain, Bethlehem; here, as a literalism of translation, it still stands in Bible versions.

The earlier Wyclifite version had regularly *burȝ toun*, *borow toun*; for this the later version (Purvey's) substituted *citee*. Only in Esther ix. 19 do we find *borow townes*, and in Gen. xiii. 12 *townes* retained.

b. In England (see the historical sketch above).

d. in *U.S.*: 'A town or collective body of inhabitants incorporated and governed by a mayor and aldermen' (Webster); but applied, in the newer States, much more loosely (see quots.), and often given in anticipation.

The legal characteristics of a city vary in different states. In some, e.g. Iowa, there are 'cities of the first class' with above 15,000 inhabitants, 'cities of the second class' with above 2,000, and 'incorporated towns', differing respectively in the complexity of their municipal organization, division into wards, and extent of municipal powers.

e. In the dominion of Canada: a municipality of the highest class.

Variously used in different provinces. In Ontario, a village, on its population exceeding 2,000, has a right to be made a 'town', with Mayor and Councillors; a town, on reaching 15,000, has a right to be erected into a 'city', whereby it is separated from the jurisdiction of the County Council, and has a Mayor and Aldermen (instead of Councillors); but towns of smaller population have also been erected into cities, by special acts of the legislature. In Quebec 'town' (= F. *ville*) is the normal title for a place with municipal autonomy, but six places have been incorporated by the legislature as 'cities', and have Aldermen, in addition to their Mayor and Councillors. In New Brunswick and Nova Scotia, the term appears to be titular, and conferred by special charter. In Manitoba it does not exist, 'town' (= F. *ville*) being alone recognized. In British Columbia, on the other hand, there are no 'towns', only 'city' and 'township or district' being legally recognized, the former having a Mayor, the latter a Reeve.

The form in modern Gaelic, with secondary accent on *-an*, is that of a diminutive of *clach*; but it is not clear what the original sense was; its most common current use is 'stepping-stones' across a stream, but it has been used for 'village' in Gaelic song and phrase. It used to be said that the three requisites of a Highland village were a church, an inn, and a smithy; hence the contextual use of *clachan* both for 'the church' and the 'public-house'. clade (kleɪd), *sb.*[2] *Biol.* [f. Gr. κλάδος branch.] A group of organisms that have evolved from a common ancestor.

1957 J. S. HUXLEY in *Nature* 7 Sept. 455/1 Cladogenesis results in the formation of delimitable monophyletic units, which may be called clades. **1963** SOKAL & SNEATH *Princ. Numerical Taxon.* v. 102 Should taxa in orthodox taxonomy be in general monophyletic groups (clades) or phenetic groups?

cladgy, variant of CLAGGY, CLEDGY.

cladist ('kleɪdɪst). *Taxonomy.* [f. CLADE *sb.*[2] + -IST.] An adherent of cladistics; a cladistic taxonomist.

1965 *Systematic Zool.* XIV. 78/2 The cladists..are forced to reconstruct the branching points by relying entirely on the differences found among existing taxa and on various deductive principles. **1968** *Nature* 9 Mar. 548/1 What the cladists forget is that the term 'relationship' has two different biological meanings, genetic relationship and genealogical relationship. **1969** E. MAYR *Princ. Systematic Zool.* x. 230 The cladists..base categorical rank on the geological time at which the ancestor of a given taxon branched off from the parental stem (or from a sister branch). **1979** *Nature* 18 Jan. 176/1 Cladists..infer that lungfish and cows shared a more recent common ancestor..from the fact that lungfish and cows share derived characters ..not found in salmon. **1982** *London Rev. Books* IV. XXIV. 13/1 The taxonomists classify themselves as cladists or evolutionary systematists.

Hence (as a back-formation) **'cladism**, the theory or methodical practice of cladists.

1966 *Systematic Zool.* XV. 91/2, I believe Mayr is wrong in regarding cladism almost as a crime against science. **1968** *Nature* 9 Nov. 547/2 The basic fallacy of cladism is to overlook the fact that 'relationship' in the evolutionary sense is determined not merely by branching but also by the subsequent divergence. **1982** *Zool. Jrnl. Linn. Soc.* LXXIV. 323 Cladism..passed, or is passing, through a phase of arrogant and repellent dogmatism which likewise unleashed a storm of often ill-informed criticism.

cladistic (klə'dɪstɪk), *a.* and *sb. Taxonomy.* [f. CLADE *sb.*[2] + -ISTIC.] **A.** *adj.* Based on or employing the concept of a clade or the ideas of cladistics; devised in accordance with cladistics.

1960 *Proc. Zool. Soc.* CXXXV. 3 Closeness of relationship in terms of phyletic lines can be called cladistic. **1963** SOKAL & SNEATH *Princ. Numerical Taxon.* viii. 220 Cladistic relationship refers to the paths of the ancestral lineages and therefore describes the sequence of branching of the ancestral lines. **1965** *Systematic Zool.* XIV. 78/2 The cladistic approach has been severely criticized. **1969** E. MAYR *Princ. Systematic Zool.* x. 211 Methods which give branching patterns primacy in classification may be designated cladistic approaches. **1973** *Jrnl. Geol.* LXXXI. 530/1 The limbs may be construed as taxonomic groups if one adopts a purely cladistic approach to classification. **1974** P. H. A. SNEATH in Carlile & Skehel *Evol. in Microbial World* 3 Cladistic relationship describes the relationship by pathways of ancestry. **1979** *Nature* 16 Aug. 541/2 Cladistic classification is..inapplicable to non-sexual organisms and will presumably never be used for microorganisms such as Protozoa, bacteria and viruses.

B. *sb. pl.* (usu. const. as *sing.*). Systematic classification of groups of organisms on the basis of shared characteristics thought to derive from a common ancestor. Also, the study of the branching of evolutionary lines of descent and the relationship between branches. (In quot. 1965, cladistic relationships.)

1965 CAMIN & SOKAL in *Evolution* XIX. 311/2 Although the study is still in progress, it has already led to an empirical method which we believe capable of deducing probable cladistics from the characters of existing organisms. **1969** *Science* 13 June 1267/3 It is often..concluded that cladistics carried to its logical extreme..does not provide a suitable basis for classifications, but this is no reason for not considering..cladistic methodology for those things that it can do well. **1973** SNEATH & SOKAL *Numerical Taxon.* x. 432 Numerical phenetics and cladistics together can allow the measurement of rates and patterns of evolution. **1979** *Nature* 16 Aug. 542/1 A thorough presentation of phylogenetics ('cladistics') is inappropriate, but we do wish to make some remarks. **1980** *Economist* 29 Nov. 31/3 The museum insists that it has not adopted cladistics wholesale, but as one of many useful methods of taxonomy. **1982** *Times* 11 Sept. 7/7 'Cladistics' is a systematic method of classification adopted by some taxonomists. It implicitly assumes evolution by descent with modification, but it avoids statements about the speed or the mechanism of evolution.

Hence **cla'distically** *adv.*, in terms of cladistics; as regards cladistics or a cladistic relationship.

1965 *Systematic Zool.* XIV. 79/1 The crocodilians are cladistically nearest to the birds. **1973** *Jrnl. Geol.* LXXXI. 539/2 Two of the three clades were widely separated cladistically. **1974** P. H. A. SNEATH in Carlile & Skehel *Evolution in Microbial World* 23 The wide host range of some arboviruses implies that if genetic exchange with host genome does occur, some viruses could be cladistically part insect, part bird and part mammal. **1980** *Economist* 29 Nov. 31/2 Cladistically speaking, the sequence of fossils on which the Natural History Museum's classic collections were based was outmoded.

clam (klæm), *a.*[1] *Obs.* exc. *dial.* [This word, CLAM *sb.*[3], CLAM *v.*[1], CLAMMY, and other derivatives, form a group of which the mutual relations are not quite clear. Although the verb is as yet cited earlier than the adj., the latter perhaps has etymological priority: it corresponds also to Du. and L.G. *klam*, in Kilian *klam*, *klamp*, 'moist, clammy, viscous, sticky', Da. and Sw. *klam* 'dampish, wettish'. Not known in the earlier stages of these languages. Cf. CLAM *v.*[1]]

'clamour, -or, *v.*[2] Also clamber. [Evidently related to CLAM *v.*[2], of which it may be a frequentative derivative (cf. *stutter*, *patter*), and so better spelt *clammer*. The actual spelling shows association with the prec. word, and actual relation to that is, of course, also possible. Identity with Ger. *klammern*, or with *clamber*, seems hardly admissible, though association with the latter is found by a correspondent skilled in campanology, who says:

Clambering describes the way in which the sounds of the bells clamber as it were one on the top of another when they get into confusion; in Yorksh. it is called *jumbling*.]

clang (klæŋ), *sb.* Also 7 clangue. [Found first late in 16th c.; app. formed immediately from, or in conjunction with, CLANG *v.*¹ Cf. L. *clangor* 'sound of a trumpet, shrill scream of birds', which were also the earliest senses of *clang*. (Thence also F. *clangueur*, and *clangueux* adj. 'loudly ringing'. Cotgr.). The Latin vb. and sb. were prob. etymologically cognate with Gr. κλάζειν, κλαγγή, in same senses; but Ger. *klang* 'sound, musical sound' (MHG. *klanc* (*klanges*), OHG. *chlang*) is not related to these, being an echoic word which has separately arisen in German. No trace of any such word is known in OE. or ME.: see however CLANK. The adoption and use of *clang* in modern English have doubtless been greatly influenced by the echoic nature of the word, by which it is associated directly with certain sounds, independently of its derivation; cf. *clang-clang*, *cling-clang*, as imitations of the sound of a bell. From this cause also the central sense of *clang* has now shifted from that of L. *clangor*; on the other hand, some writers have used it as identical with Gr. κλαγγή or Ger. *klang* above mentioned.]

1. a. A loud resonant ringing sound; orig., as in Latin, that of a trumpet, and so still in literary use; but now, most characteristically, the ringing sound of metal when struck, as in 'the clang of arms'; sometimes also the sound of a large bell.

[In OE. *slarie, slareȝe*; in 16th c. *claré, clarie*, evidently representing the med.L. *sclarea*, in mod.F. *sclarée*, though the loss of *s* is not actually explained. *Sclarea* occurs in Matthioli, and Turner (1548); Lobel (1576) has '*scarlea*, Ger. *scharlach*, Belg. *scarleye*, It. *sciaria* [Florio has *schiarea*], Angl. *clarye*'; Pritzel and Jensen, *Deutschen Volksnamen Pflanz.* 359, give OHG. *scaraleia*, later *scarleia, scharleya, scarleye*; Gerard has *scarlea, sclarea*; *scariola* is also given

by some as a med.L. synonym, and has been suggested as the original form of the word. But the evidence of the OE. vocabulary and Leechdoms supports the antiquity of *sclarea*, without throwing any light upon its origin or history. In the 16th c. *clarey* was solved by the apothecaries into *clair-ye*, *clear-eye*, translated *Oculus christi*, *Godes-eie*, and *See-bright*, and eye-salves made of it (Prior), on the strength of this supposed derivation.]

clash (klæʃ), *sb.* Also 6 clasche, classhe. [This and the associated verb are first found about 1500, and appear to be onomatopœic; arising, in the main, from instinctive association with classes of pre-existing echoic words. The initial element is that of *clap*, *clack*, etc.; the final that of *dash*, *splash*, *smash*, *swash*, etc., or perhaps a direct imitation of the element of sound common to these. *Clash* thus suggests an action produced in the same way as a *clap* or *clack*, which, instead of abruptly ending like these, is broken down as it were into, and results in, a mingled mass of smashing or rustling sounds. A parallel relation exists in *crack*, *crash*, perh. in *smack*, *smash*, and in the dial. *swack*, *swash*; cf. also *bash*, *blash*, *brash*, as instances of words having a kindred element of form and signification. There is no *phonetic* relation between *clack* and *clash*; i.e. no way by which *-ash* could have been developed (in English) out of *-ack* by the mere operation of phonetic processes.]

clasp (klɑ:sp, -æ-), *sb.* Forms: 4–6 claspe, 5 clospe, clespe, 5–7 clapse, (6 glaspe), 7, 9 *dial.* claps, 4– clasp. [This, and the vb. of same form, appear in 14th c. Priority in time is given by our quots. to the sb., the etymological priority of which is also favoured by their general tenor. From an early date the form *claspe* varies with *clapse* (still used in southern dialects), but the evidence fails to show which is the original. No trace of either form is found outside English; and the origin is entirely a matter of conjecture. Senses 1–2 appear to have been the source of the vb., and senses 3–6 in turn to have been influenced by or wholly taken from the vb.
The sb. in its latter part recalls HASP, or *hapse* (OE. *hæpse*, ON. *hespe* a clasp, or fastening); also MLG. and MDu. *gaspe*, *gespe*, Du. *gesp*, clasp, buckle. (Wedgwood suggests direct imitation of the sound of a metal fastening, as when we speak of the *snap* of a bracelet.) Whether *clapse* (if this were the original form) could be formed in some way from, or influenced by, CLIP *v.* (OE. *clyppan*) to embrace, *complecti*, *amplecti*, appears doubtful, inasmuch as this meaning is little applicable to the primary senses of the sb., and appears to have been a later development in the vb., whence it was taken back into later senses of the sb.]

In English Grammar Schools the traditional and conventional division is into Six *Forms* numbered from the lowest upward. In large schools these are for practical purposes often subdivided into lower, middle, and upper or other divisions, which are really distinct classes. The number of *Classes*, on the contrary, when this term is used, is unlimited, and they are usually reckoned from the highest downward.

Hence *class-system*, now often opposed to the 'university system', in which this uniform fixed curriculum does not obtain. Also *class day*, etc.: see 10.

classic ('klæsɪk), *a.* and *sb.* [ad. F. *classique*, or L. *classic-us* of the highest class, of the first order, f. *classis*: see CLASS *sb.* and -IC.

Gellius has 'classicus .. scriptor, non proletarius', where the word means 'high-class', as opposed to 'low' (cf. *proletarius sermo*, Plautus), and this is the main sense of *classique* in Cotgr., as well as in our earliest examples. Littré however takes as his first sense of *classique* 'Used in or belonging to the classes of colleges or schools'; and it is probable that this notion has influenced the word in its extension to the ancient authors generally, as studied in school or college, together with the associated languages, literature, history, geography, mythology, art, etc. It is probable, also, that the transference of the epithet from the first-class or standard writers in Greek and Latin to these languages themselves has been partly owing to the notion that the latter are intrinsically excellent or of the first order, in comparison with the modern tongues. But the extension has probably been in the main unthinking and unanalysed: the Greek and Roman authors read in school were actually the classical writers in these languages, and thus 'classic' became practically synonymous with 'ancient Greek or Roman'. Cf. also the modern L. *locus classicus*, the passage of first-rate authority or importance.]

The original sense was 'clear, pure'; OHG. shows how this passed into the mod.G. sense 'little'; the orig. sense is more nearly retained in Eng., where, however, it has been encroached upon by the Romanic *clear* and *pure*.

The final *-n*, *-ni*, is suffixal; the stem *klai-* is by some referred to the vb.-stem *klī-*, *klai-*, *kli-* 'to stick', with the suggested connexion of sense that sticky things, such as oil, give a clear surface, or 'make the face to shine'. Cf. also the ancient practice of anointing, with its associations.

The early variants *cláne*, *clone*, are app. due to a mixture of the orig. adj. *cláene* with the orig. adv. *cláne*: cf. SOFT.]

The frequent ME. and mod. dial. *clanse* may represent an OE. *clánsian* (cf. *cláne* under CLEAN), or it might be from *clænsian* with shortened *æ*, as *clense* from *clensian*. The mod. spelling *cleanse* seems to be artificial, assimilated to *clean*. This is the original vb., on the domain of which the recent *to clean* has intruded.

The type of verbs in *-isôn*, *-irôn*:—OTeut. *-isôjan*, *-izôjan*, appears to have started from verbs in *-ojan* formed on *-s* stems, as Goth. *hatizôn*, OHG. *agisôn*, *sigirôn*. cleavage ('kli:vidʒ). [f. CLEAVE *v.* + -AGE.]

1. a. The action of cleaving or splitting crystals and certain rocks along their lines of natural fissure; the state of being so cleft.

1816 CLEAVELAND *Min.* 9 The primitive forms of crystals can be ascertained only by mechanical division. This process, sometimes called *cleavage* by lapidaries, consists in separating thin layers or slices from the sides, edges, or angles of a crystallized substance in a given direction. **1831** BREWSTER *Optics* xvii. §90. 145 We may by a new cleavage replace the imperfect face by a better one.

b. *Min.* Arrangement in laminæ which can be split asunder, and along the planes of which the substance naturally splits; fissile structure; the property of splitting along such planes.

1830 SIR J. HERSCHEL *Stud. Nat. Phil.* 291 The texture or cleavage of a mineral. **1869** ROSCOE *Elem. Chem.* 191 Crystalline bodies exhibit .. a peculiar power of splitting in certain directions more readily than in others, called cleavage.

c. *Geol. slaty cleavage*: the fissile structure in certain rocks, especially in clay slate and similar argillaceous rocks, whereby these split into the thin laminæ or 'slates' used in roofing, etc. This structure is quite distinct from, and in origin posterior to, the stratification and jointing, the cleavage-lines crossing these at any and every angle, while parallel to themselves over extensive tracts of country.

Geol.* 121 This superinduced fissility or 'cleavage' has resulted from an internal rearrangement of the particles in planes perpendicular to the direction in which the rocks have been compressed.

d. (with *pl.*) The direction or plane in which a crystal or rock may be split.

1817 B. JAMESON *Char. Min.* 135 The cleavages are not parallel with any of the planes of the crystal. **1869** TYNDALL *Light* 73 By following these three cleavages it is easy to obtain from the crystal diamond-shaped laminæ of any required thinness.

cleave, var. of CLEVE, cliff, steep declivity.

cleave (kli:v), *v.*[1] Pa. t. clove, clave, cleaved, cleft; Pa. pple. cloven, clove, cleaved, cleft. Forms: see below. [Common Teut.: OE. *clíofan*, *cléofan*, pa. t. *cléaf*, pl. *clufon*, pa. pple. *clofen*, corresp. to OS. *kliobан* (MDu. *clieven*, *clûven*, Du. *klieven*), OHG. *chlioban* (MHG., mod.G. *klieben*), ON. *kljúfa* (Sw. *klyfva*, Da. *klöve*), not recorded in Gothic:—OTeut. type **kleuƀ-*, *klauƀ—kluƀum*, *kluƀano-*, corresp. to pre-Teutonic **gleubh-*, in Gr. γλυφ- 'to cut with a knife, carve', and perh. L. *glūb-* 'to peel, flay'.

The early ME. inflexion was *cleoven* (*clēven*), *clêf* (pl. *cluven*), *cloven*. Assimilation to the pa. pple. soon changed the plural of the pa. t. to *cloven*, *clove*, and by 14th c. *clove* was extended to the singular, where *clêf*, *clêve*, became obs. about 1500, making the later inflexion *clēve*, *clōve*, *clōven*. The pa. pple. had also the shortened form *clove*, which survives as a variant in poetry. A pa. t. *clave* occurs in northern writers in 14th c., passed into general use, and was very common down to *c* 1600; it survives as a Bible archaism. A weak inflexion *cleaved* came into use in 14th c.; and subsequently a form *cleft*; both are still used, *cleft* esp. in pa. pple., where it interchanges with *cloven*, with some differentiation in particular connexions, as 'cleft stick', 'cloven foot': see these words.

From the 14th c. the inflexional forms of this verb have tended to run together with those of CLEAVE *v.*[2] 'to stick'. Though the latter was originally *clíve*, it had also the variants *cleove*, *clēve*, the latter of which at length prevailed; the two verbs having thus become indentical in the present stem were naturally confused in their other inflexions. The (originally northern) pa. t. *clave*, which appeared in both in 14th. c., is not normal in either; it was apparently analogical, taken over from one of the other classes of strong vbs. having *a* in the past, as from *breke*, *brak(e*, *broken*, *speke*, *spak(e*, *spoken*. (It would of course be possible to explain the pa. t. singular *clove* in the same way.) The weak pa. t. and pa. pple. *cleaved* were probably mainly taken over from CLEAVE *v.*[2], where they were original; but they might also arise independently in this verb. For the subsequent shortening of *cleaved* to *cleft*, there was the obvious precedent of *leave*, *left*, *bereave*, *bereft*, etc.]

cleave (kli:v), *v.*[2] Pa. t. cleaved, clave; Pa. pple. cleaved. Forms: see below. [OE. had two verbs; *clífan* str. (**cláf*, pl. *clifon*, *clifen*), and *clifian*, *cleofian* wk. (*clifode*, *-od*). (1) The former was a Com. Teut. strong vb., in OS. *biklîban* to adhere (MDu. *clîban* to cling, climb, Du. *beklijven* to adhere, stick), OHG. *chlîban* (MHG. rare, *klîban*) to adhere, stick, ON. *klîfa* to clamber, climb by clinging:—OTeut. **klîb-an*, perhaps ultimately f. simpler root *kli-* to stick: cf. CLIMB, CLAY, CLAM. Of this str. vb. OE. shows only a few examples of the present, its place being generally taken by (2) the derivative *clifian*, corresp. to OS. *clîbon* (MDu. *clēven*, Du. *kleven*), OHG. *chlebên* (MHG. and G. *kleben*):—OTeut. **klîbôjan*, f. weak stem *klîb-* of the strong vb. This had in OE. the variants *cliofian*, *cleofian* (with *o* or *u* fracture of *i*; cf. *lifian*, *leofian*, to live, Sc. *leeve*), whence in ME. *clive*, and *clēve*, *cleeve*; the latter finally prevailed, and is now written *cleave*. Instead of the normal pa. t. and pple. *clived*, *cleved*, we find also from 14th c. *clave*, occas. *clef*, *clof*, *clove*, and in 17th c. *cleft*; in the pple. *clave*, *clove*, and *cleft*. At present *cleave*, *cleaved*, is the ordinary inflexion, but the influence of the Bible of 1611, in which *clave* is frequent (beside, and in the same sense as, *cleaved*), has made that an admissible form: *clove*, *cleft* are now left to CLEAVE *v.*[1]

The final predominance of *cleve* rather than *clive* as the ME. form made the present stem identical in form with that of CLEAVE *v.*[1] to split. Hence their inflexional forms were naturally also confused, and to some extent blended or used indiscriminately. The pa. t. *clave* attached itself in the 14th c. to both; in this verb it corresponds to the original strong pa. t. **cláf*, but does not appear to be continuous with it; it was prob. a new form due to analogy: see note to CLEAVE *v.*[1] The occasional pa. t. *clef* belongs properly to CLEAVE *v.*[1]; as perhaps also *clof*, *clove*. (The occas. pa. pples. *clave*, *clove*, are from the pa. t.) The weak inflexion *cleaved* is of course proper to this verb, and prob. was transferred hence to CLEAVE *v.*[1] The shortened *cleft* found in both, appears to be due to the analogy of *leave*, *left*, *bereave*, *-reft*. To the same analogy is probably due the mod. spelling *cleave* in both verbs: this is not etymological, for both words had close *e* in ME., and would properly now be *cleeve* or *clieve*.]

[Commonly believed to be f. *clere*, CLEAR + STORY stage of a building, 'floor' of a house. (*Clere* must here have meant 'light, lighted,' since the sense 'free, unobstructed' did not yet exist: see CLEAR *a.*)

This assumed derivation is strengthened by the parallel *blind-story* (see BLIND *a.* 16), although this may have been a later formation in imitation of *clere-story*. The great difficulty is the non-appearance of *story* in the sense required before *c* 1600, and the absence of all trace of it in any sense in 14th, 15th, and chief part of 16th c. At the same time there is a solitary instance of *storys* in R. Glouc. (1724) 181, which may mean 'elevated structure' or 'fortified place'. The sb. *estorie* in OF. had no such sense, but the pa. pple. *estoré* meant 'built, constructed, founded, established, instituted, fortified, furnished, fitted out', whence a sb. with the sense 'erection, fortification' might perhaps arise.]

6. a. Old Law. ***benefit of*** (***his***) ***clergy***, also simply (***his***) ***clergy***: orig. the privilege of exemption from trial by a secular court, allowed to or claimed by clergymen arraigned for felony; in later times the privilege of exemption from the sentence, which, in the case of certain offences, might be pleaded on his first conviction by every one who could read. Abolished, after various earlier modifications, in 1827. Cf. NECK-VERSE.

The ability to read, being originally merely the test of the 'clergy', or clerical position, of the accused, came at length to be in itself the ground of the privilege, so that the phrase became = 'benefit of scholarship' (sense 5, instead of 1).

cleric ('klɛrɪk), *a.* and *sb.* [ad. late L. *clēric-us* clergyman, priest, prop. an adj. 'of or belonging to the *clērus*'; a. Gr. κληρικ-ός 'of or pertaining to an inheritance', in later (Christian) use 'of or belonging to the ecclesiastical or sacerdotal order', f. κλῆρος 'lot, allotment, piece of land, estate, heritage', used in 2nd c. as a name of the ministerial or sacerdotal order in the church, the clergy. The Greek words were adopted in Latin in this transferred sense only (*clērus* in Tertullian *a* 220, *clēricus* in Jerome 4th c.), with which they passed into Romanic and English. Cf. CLERK.

On the history of the application of κλῆρος to the Christian ministry, see Bp. Lightfoot *Philippians* (1868) 245–6, where its probable origin is seen in the use of the word in Acts i. 17, τὸν κλῆρον τῆς διακονίας ταύτης 'the lot of this ministry'; cf. i. 25. In the time of Jerome, explanations were sought in the use of κλῆρος in Deut. xviii. 2, compared with ix. 29, and parallel passages; and 1 Peter v. 3 was interpreted in this sense. Jerome's explanation is thus repeated in the *Apology for the Lollards* (*c* 1400) 43:

'The clerk..schuld interpret þe calling of his nam, and enforce to be þat he is seid; for a clerk in our speche is seid *sort*, and þer for are men seid *clerkis*, for þei are of þe Lordis sort, or for þe Lord is þer part; and for he is þe Lordis part, or haþ þe Lord his part, he au[h]t to haue him s[u]ilk þat he haue þe Lord, and be had of þe Lord.']

clerk (klɑ:k, klɜ:k), *sb.* Forms: 1 clerec, (cliroc), 1–3 cleric, 1–7 clerc, 3 clærc, (*gen. pl.* 2–3 clerkene, 4 clerken), 3–7 clerke, 4 klerk, 5–6 clerck(e, 5–7 clarke, 5–8 clark, 6 clarcke, 6–7 cleark(e, 4– clerk. [OE. had *cleric*, *clerec*, *clerc*, immed. from Latin; the last of these forms coincided with OF. *clerc*:—Romanic type **clerco*:—L. *clēric-us*, *-um* (cf. Pr. *clerc*, *clergue*, *clerge*, Sp. *clerigo*, It. *chierico*): see CLERIC. The original sense was 'man in a religious order, cleric, clergyman'. As the scholarship of the Middle Ages was practically limited to the clergy, and these performed all the writing, notarial, and secretarial work of the time, the name 'clerk' came to be equivalent to 'scholar', and specially applicable to a notary, secretary, recorder, accountant, or penman. The last has now come to be the ordinary sense, all the others being either archaic, historical, formal, or contextual.

The pronunciation (klɑ:k) is evidenced in the south of England from the 15th c.; cf. *bark*, *hark*, *dark*, etc., from earlier *-er*; also *serjeant*, *hearth*, *Cherwell*, *Hertford*, and the 15–17th c. *clargy*. The dialects, esp. the northern, have retained the *e*, as Sc. (klɛrk, klerk). In U.S. the pronunciation is (klɜ:k); 'of late this has become somewhat frequent in London and its neighbourhood' (*N.E.D.*).]

b. Hence, since the Reformation, applied to laymen who perform such of these offices as are retained in cathedrals, churches, or chapels. In the Prayer-book of 1549 *the clerks* were the choir men; in later times, *the clerk*, or *parish clerk*, is the lay officer of a parish church, who has charge of the church and precincts, and assists the clergyman in various parts of his duties, *e.g.* by leading the people in responses, assisting at baptisms, marriages, etc. In other senses, usually with some distinctive epithet, as *Bible clerk*, a scholar who reads the Scripture lessons in some ancient college chapels; *lay clerk*, a singing man in some cathedrals and college chapels; *singing clerk*, etc.

clever ('klɛvə(r)), *a.* (and *adv.*) Also 3, (8- *dial.*) cliver, 7 cleever, 7–8 cleaver. [Early history obscure: app. in local and colloquial use long before it became a general literary word. A single example of *cliver* is known in ME., but the word has not been found again till the 16th c., and it appears not to have been in general use till the close of the 17th, since Sir Thos. Browne specially mentions it as East Anglian, and Ray explains it among his dialect words. Outside Eng., Koolman gives EFris. *clüfer* (from *clifer*), clever, skilful, alert, ready, nimble, and *klöver*, *klever* is used in same sense at Ribe Stift in Jutland (Molbech). The early example suggests relation to ME. *clivers* 'claws, talons, clutches', in the sense 'nimble of claws, sharp to seize', and the 16–17th c. examples (also of *cleverly*) show it connected with the use of the hands, a notion which still remains in the general sense of *adroit, dexterous*, having 'the brain in the hand'. Cf. also CLEVERUS. *Clever* appears to have come into general use about the time that *deliver*, formerly used in the sense 'expert', became obsolete, but

there is no trace of any influence of the one upon the other. The sense-development has analogies with that of *nimble*, *adroit*, *handy*, *handsome*, *nice*, *neat*, *clean*.

climb (klaɪm), *v.* Pa. t. and *pple.* climbed (klaɪmd); *arch.* clomb (kləʊm). [OE. *climb-an, clamb* (*clǫmb*), *clumbon, clumben*, corresp. to OHG. *chlimban*, MHG. *klimben, klimmen*, MDu., MLG., Du., LG., Ger. *klimmen* :—WGer. **klimban*. Believed to be a nasalized form of OTeut. **klīban* (see CLEAVE *v.*[2]), the *m* being perh. originally a characteristic of the present stem, which has been extended to the other parts, and has carried the vb. from the ablaut series of *î, ai, i*, into that of *im, am, um*. Hence the sense-development 'cleave, adhere to, get up by clinging or adhering'; for which cf. OE. *clífan* to cleave, cling, MDu. *clīven* to cleave, stick, also to climb, ON. *klífa* and ME. *clīven* to climb. In all the modern langs. the *b* is lost in pronunciation, and in most in spelling also; but in Eng., although *climme, clime*, formerly prevailed, the spelling now recognized is *climb*. In most of the dialects the *i* is short, *clim*; but the standard language, like east midland and eastern, has the *i* long (klaɪm), the vowel being lengthened before *mb*, app. as before *nd* in *bind, find*, etc. (But clear evidence of the long vowel has not been found before the 16th c.) The original strong inflexions also remain dialectally (notably in Sc. *clim, clam, clum*), but in the south, weak forms appeared already in 13th c., and prevail in 16th c. prose; no others occur in Shaksp. or in the Bible of 1611. But the Elizabethan archaists affected a pa. t. and pple. *clome, cloame, clōmbe*, which they appear to have taken from Chaucer or Lydgate, and mistakenly pronounced with long *ō*. (In the ME. *clomb(e, o* was either short, as a variant of *clamb*, or more usually a graphic expedient for *u* before *m*; and in the dialects in which *clom* has come down the *o* is short.) From Spenser and his contemporaries, *clōmb* passed into later poetry, and occasionally appears in prose, especially in writers familiar with the strong *clam, clom*, or *clum* in dialect use.]

clink, *sb.*² [The evidence appears to indicate that the name was proper to the Southwark 'Clink', and thence transferred elsewhere; but the converse may have been the fact. If the name was originally descriptive, various senses of *clink*, e.g. 'to fasten securely' (cf. 'to get the clinch', CLINCH *sb.* 7), might have given rise to it. Cf. also CLINK *sb.*⁴]

†**clink**, *sb.*⁴ *Obs. rare*—¹. [Meaning and origin uncertain.

The Glossary to first ed., professedly based on Spenser's authority, explains it as 'key-hole'; for the word in such a sense no etymology is known, and the reference to *clicket* is quite erroneous. Some identify the word with Du. *klink*, Ger. and Da. *klinke*, Sw. *klinka*, (also Fr. *clinche*, *clenche*) 'latch of a door'. Cf. also '*clink*, a small or fine crack'. ADDY *Sheffield Gloss.* 1888.]

clink (klɪŋk), *v.*¹ Forms: 4 klynk(e, 4–6 clynk(e, 6–7 clinck(e, clinke, 6– clink. [A weak vb. found, with the sb. of same form, only from 14th c. Du. has a strong vb. of identical form, *klinken* (MDu. *klincken* and *klinghen*) 'to sound, clink, ring, tinkle', for which HG. has the str. *klingen*, OHG. *chlingan*, LG. *klingen*, EFris. *klingen* (*klung*, *klungen*) 'to ring, sound', and *klinken* (*klunk*, *klunken*) 'to clink glasses', WFris. *klinckjen*, *klingjen*. Also Sw. *klinga* str. (OSw. also *klinga*, *klinka* weak), Da. *klinge* str. 'to sound, ring', *klinke* 'to clink glasses'. Thus there appears a double stem-form, *kling-*, *klink-*, evidently (like the Lat. and Gr. words cited under CLANG) of echoic origin; one of these forms was prob. a later modification (? perhaps expressing a variety of sound); the evidence appears to favour the priority of *kling-*. No trace of either form has yet been found in OE. (where

there is a strong vb. *clingan* in an entirely different sense: see CLING *v.*), and thus we cannot tell whether ME. *clinken* went back with the Du. to an OLG. **klinkan*, or was of later adoption or origination in England. Cf. the still later CLANK, and its correspondence with Du. *klank*. The sense-development is greatly parallel to that of *clank*; the transition from sound to sudden action is a common one, esp. in Sc.; cf. *bang*, *boom*, *bum*, *chop*, *clank*, *clap*, *pop*, etc.

clock, *sb.*¹ Forms: (1 clucge), 4–5 clok, clokke, clocke, 6 klocke, 6– clock. [OE. *clucge* (or *cluccge*) is found only once, and has no historical connexion with the extant word which goes back app. only to the 13–14th c. ME. *clok(ke*, *clocke*, was either a. MDu. *clocke* (mod.Du. *klok* 'bell, clock'), or a. ONF. *cloke*, *cloque* = Central Fr. *cloche* 'bell'. The Du. is cognate with OFris. *klocka*, *klocke*, EFris. *klokke*, *klok*, MLG. *klocke*, LG. *klokke*, *klokk*, *klok*, OHG. *glocka*, *klocka*, *glogga*, MHG. *glocke*, *klocke*, *glogge*, Ger. *glocke* 'bell', ON. *klocka*, later *klukka* 'bell', Norw. *klokka*, *klukka*, Sw. *klocka*, Da. *klokke* 'bell, clock'. The French *cloque*, *cloche*, with Pr. *cloca*, *clocha*, Piedm. *cioca*, descends directly from late L. *cloc(c)a* (8th c.). In all the prec., as in OE. *clucge*, the word is fem.; but in Celtic, OIr. *cloc* (genit. *cluic*:—**cloci*), Irish *clog*, Gael. *clag* (genit. and pl. *cluig*), Corn. *cloch*, Bret. *kloc'h*, 'bell', are masc.; only Welsh *cloch* is fem., and its pl. *clych* points perh. to an earlier masc.
Known since about 8th c. in Merovingian L., in Celtic, and in Teutonic; early diffusion app. connected with that of Christianity in western and northern Europe; not found in the southern Romanic langs. where *campana* is the word for 'bell'. Locality of origin undetermined: some refer it, on historical considerations, to Celtic; some think it possibly connected with OHG. *cloccôn*, *chlocchôn*, MHG. *klocken* 'to strike, knock'; but the variant forms in OHG. point rather to its being foreign. Wherever it actually arose, it was prob. echoic, imitating the rattling made by the early handbells of sheet-iron and quadrilateral shape, rather than the ringing of the cast circular bell of later date. The relation of the rare OE. *cluc(c)ge* to the other forms, which agree generally with the types *klok*, *klokka*, is obscure.
For the original and general sense of this word in the other langs., English had the word BELL in regular use; it is probable, therefore, that *clock* was introduced either with striking clocks, or at least with bells on which the hours were mechanically struck; it was prob. never prevalent in ME. in the mere sense 'bell'.]

†1. A bell (the sense of OE. *clucge*; in ME. prob. only as a retention of the Fr. use). *Later*, the gong of a striking watch. *Obs.*

[*c* **1715** *Lond. Gaz.* No. 5307/3 A Gold striking Pendulum Clock Watch.]

2. a. An instrument for the measurement of time; properly, one in which the hours, and sometimes lesser divisions, are sounded by strokes of a hammer on a bell or similar resonant body; but many clocks now do not strike. The mechanism consists of a train of wheels set in motion by weights or a spring, actuating and regulated by a pendulum or balance-wheel, and requiring to be periodically wound up; the passage of hours, minutes, etc., is indicated by 'hands' or pointers, on a 'face' or dial-plate.

cloff (klɒf). *Commerce.* Also *erron.* clough. [Origin obscure. Identity with CLOVE, the weight, has been suggested. Cf. also CLEF.] An allowance (now of 2 lbs. in 3 cwt., or $\frac{1}{168}$), given with certain commodities, in order that the weight may hold good when they are sold by retail.

According to Grafton, 1568, cloff was the grocer's name for the fixed allowance made to the buyer in lieu of the variable advantage which he formerly had through the inclination in his favour of the King's Beam, a practice abolished in 1269. (See also the *Ordinance of Staples*, 1353, c. 10.) But there is a long gap between 1269 and 1502, when our quotations begin. Fabyan, whom Grafton copies verbatim for his text, has no mention of *cloff*.

(Cockayne understood the OE. name to mean *Ranunculus sceleratus*; which is probable, since both *clufþung* and *clufwyrt* are glossed by *Batrachion*, an old name of *Ranunculus*. But the ME. name seems to mean a hellebore, as in Halliwell's modern entry.)

close (kləʊz), *v.* Forms: *α.* 1 clýsan, 3 clusen; *β.* 3– close, (4 klose, 5 cloose, 7 cloze, *north.* 5–6 cloyse, 6 cloise, clois(s). [ME. *close-n* (13th c.), a. OF. *clos-* stem (*close* pres. subj.) of *clore*:—L. *claud-ĕre* to shut, close. OE. had already the vb. *clýs-an*, f. *clús*(*e*, a. late L. *clūsa* = *clausa* 'shut or enclosed place'. This came down to 13th c. in form *cluse-n* (*ü*), and probably *close-n* was at first viewed simply as a frenchified pronunciation of this earlier word: cf. *biclusen*, BECLOSE.

In French *clore* is of little importance, having been almost superseded by *fermer*:—L. *firmāre*, to make firm or fast, to fasten. In English, on the other hand, *close* and its accompanying adj. and sbs. have become great and important words, developing whole groups of senses unknown to French.]

I. To stop an opening; to shut; to cover in.

1. a. *trans.* To stop up (an opening or channel) so that it ceases to be open or to allow of passage. Where the opening is provided with a gate, door, or lid, turning on hinges or sliding, to 'shut' this is to close the opening; hence 'close' and 'shut' become to a certain extent synonymous, as in 'shut' or 'close the door, the eyelid', etc.

Close is, however, a more general word, to *shut* being properly only a way of closing; hence the former is generally used when the notion is that of the resulting state, rather than the process.

b. *To close* is also applied to the place, chamber, vessel, etc., to which the opening leads, or the thing which the lid shuts up, as in 'to close (or shut) a box, the eyes, a book', 'to close a room'. In reference to places, *close* usually means that access to them is officially stopped for the time, as 'the Bodleian Library is closed for a week', 'the grounds are closed to the public'. (In this sense *shut up* is colloquially used.)

clote, obs. form of CLOT, CLOUT.

clote (? read *clete*), obs. form of CLEAT *sb.*

cloter, obs. form of CLOTTER.

cloth (klɒθ, -ɔ:-), *sb.* Forms: 1 cláð, 1-4 claþ, 3 cloð, 4 cloþ, 4- cloth, (4 cloþt, 4-5 cloþe, clooþ, clooth, 5 cloiþ, 4-7 clothe, 6-8 cloath). *North.* 3-5 clath, 4-5 klath, clathe; *Sc.* 5-6 clayth, -t, 5- claith. Also 4 cleth. [OE. *cláþ*, corresp. to OFr. *klâth*, *klâd*, *klêth* (mod. Fris. Saterl. *klâth*, NFris. *klâid*, WFris. *klaed*, EFris. *klêd*, Wangaroog *klêt*); MDu. *cleet*, pl. *clêde*, Du. and LG. *kleed* (*klêd*), MHG. *kleit* (*kleides*), Ger. *kleid*. Unknown in OS., OHG., and Gothic; its general diffusion through the German dialects appears to date about the middle of the 12th c. The ON. form *klæði* (whence Norw. and Da. *klæde*, Sw. *kläde*) does not correspond in vowel or ending to the WGer. (which would require *kleið* in ON.); its history is obscure. Beside OE. *cláþ*, which was the source alike of midl. and south. *cloth*, *clothes*, and north. *clath*, *claith*, pl. *clathis*, *claise*, a form *cláþ* is recorded once (see 1 below); if genuine (which is doubtful), this may be the source of the north. ME. *cleth*, *clethis*, *clese*, which have otherwise been referred to a Norse origin.

The original pl. *cláðas*, is directly represented by the existing CLOTHES, q.v.; this (kləʊðz) is now restricted to the sense 'garments'; for other senses, *cloths* has gradually come into use since *c* 1600, though the complete differentiation of *clothes* and *cloths* belongs to the 19th c., *cloaths* being a prevalent spelling of both in the 18th c. 'The pronunciation of *cloths* varies: northerners generally say (klɒθs), or (klɔ:θs); Londoners usually (klɔ:ðz), esp. in senses 1-8, though some reduce it to (-klɒθs) in combination, as in *table-cloths*, *neck-cloths*; many would say (klɒθs), or (klɔ:θs), meaning 'kinds of cloth' (see II)' (*N.E.D.*).

The etymology and even the primary sense of OTeut. **klaiþ-* are uncertain. The former is prob. to be sought in the Teut. vb. stem *klî-*, *klai-*, to stick (CLAY, CLEAN, CLEAM), but whether the name was applied to *cloth* as a substance felted or made to stick together, or to *a cloth* as a thing to be attached or made to cling to the body, is doubtful. The earliest known uses of OE. *cláþ* are not for the material (a sense hardly evidenced in OE.), but for 'a cloth' as a thing to wrap or wind about the body; from this primitive rudiment of attire, we pass naturally on the one hand to the more fully developed 'clothes' or garments, and on the other to the material of which all such articles are composed.]

9. a. A name given, in the most general sense, to every pliant fabric woven, felted, or otherwise formed, of any animal or vegetable (or even mineral) filament, as of wool, hair, silk, the fibres of hemp, flax, cotton, asbestos, spun glass, wire, etc. But when used without qualification or contextual specification, usually understood to mean a *woollen* fabric such as is used for wearing apparel. Here again, it is sometimes specifically applied to a *plain-wove* woollen fabric, as distinguished from a *twill*.

To this most specific sense belong the terms BROAD-CLOTH and NARROW-CLOTH, q.v., the ordinary *black-cloth* used for 'dress' clothes, clerical attire, etc., and the blue, scarlet, green, or other 'cloth', of uniforms and liveries.
